VENECIA VELARDE

3D Artist & Modeler for Video Games | Blender, Unity and Unreal Engine Experience

+52 33 2497 3654 | venecia.paz.v@gmail.com | sketchfab.com/Tomoe_512/models | tomoe0512.github.io | Jalisco (UTC-6)

EXPERIENCE

3D Artist

Amber Studios

2025 - Present

- Sculpted high-quality stylized assets and pets for Roblox, following art direction.
- Integrated into structured production pipeline, participating in daily stand-ups and sprint planning.
- Collaborated with senior artists and leads to maintain visual consistency across all assets.
- Created stylized assets for Roblox, providing group feedback to maintain artistic direction.

3D Artist

Players Journey

2025 - Present

https://futurium.de/futureland

- Modeled and textured 3D assets for mobile games, implementing art direction feedback.
- Optimized texture application processes for existing models, improving asset compatibility.
- Weekly reviews and direct collaboration with Project Manager and programmers.
- Coordinated weekly with project manager and programmers to ensure technical and artistic alignment.
- Edited textures for pre-established models.

Drawing and 3D Modeling Tutor

UNIAT

2021 - 2024

- Developed and delivered curriculum for basic 3D modeling, rendering, and Unity integration.
- Instructed drawing courses covering traditional techniques, anatomy, and lighting principles.
- Mentored students in portfolio development for entry into game art careers.

PROJECTS

Mindaro

2024 - Present

https://burningboats.github.io/mindaro

Burning Boats

- Executed full 3D pipeline for character and environment assets, from concept to engine implementation.
- Collaborated with development team to maintain artistic vision throughout production.
- Sculpted creatures and stylized props based on concept art, ensuring gameplay functionality.

Games Jams

2022 - Present

- Produced 3D assets under tight deadlines using Unity, Unreal Engine, and 3DS Max.
- Created 2D assets and UI elements to support game development in rapid prototyping environments.

Sleepless Experiment

2025

https://kobari.itch.io/sleepless

- Developed visual design and 3D modeling in Unreal Engine 5.
- Created concept art in dynamic environments.
- Collaborated with programming and audio managers for 4 days.

SUMMARY

3+ years of experience in 3D modeling and hand-painted texturing for indie games and GameJams.
Detail-oriented and creative artist, with problem-solving and teamwork skills.
Committed to creating unique visual experiences that emotionally connect players.

KEY ACHIEVEMENTS

80% Reduction in Asset Creation Time, at Players Journey

Optimized environment modeling workflows, reducing production time from 5 to 1 hour per asset while maintaining quality standards and completing a full set of game assets ahead of schedule, enabling faster iteration and testing cycles.

3D Modeling for Mindaro, at Burning Boats

Coordinated with the programming and animation departments to define pipeline, replicated throughout the game's development, maintaining a defined artistic standard throughout the project to ensure consistency.

Qualification for the Supernova Banamex Semifinals, AT MINDARO

Designed and developed a mini demo and gameplay pitch using video game development tools, securing a spot in the semifinals and attracting key contacts interested in the project.

Extended Catalog of Roblox assets, at Amber Studios

Created 5 main mascot figures and 15 variants, designed hand-painted textures for realistic and stylized environments, and developed particles and UGC assets, significantly expanding the platform's asset catalog.

TOOLS

Substance Painter, 3ds Max, Photoshop, Clip Studio, Aseprite, Blender, Unreal Engine, Unity, Roblox Studio

SKILLS

Soft Skills

Creativity, Attention to Detail, Problem Solving, Teamwork, Adaptability, Communication, Time Management, Continuous Learning

Hard Skills

3D Sculpting, Hand-Painted Texturing, Stylized PBR, Retopology, UV Unwrapping, Character Modeling, Environment Design, Prop Creation, 3D Pipeline, Asset Optimization, VFX

EDUCATION

Bachelor of Design and Art for Videogames

University of Advanced Technologies

2021 - 2024
